

# DI-824VUP+ Screenies

FW: 1.00

Created by: Scott Howell

The screenshot displays the web management interface for the D-Link DI-824VUP+ router. At the top left is the D-Link logo with the tagline "Building Networks for People". To the right is the "AirPlus Xtreme G+" logo and the text "High-Speed 2.4GHz Wireless VPN Router". A navigation bar at the top contains buttons for "Home", "Advanced", "Tools", "Status", and "Help". On the left side, there is a product image of the DI-824VUP+ router and a vertical menu with buttons for "Wizard", "Wireless", "WAN", "LAN", "DHCP", and "VPN". The "Wizard" button is highlighted in yellow. The main content area is titled "Setup Wizard" and contains the following text: "The DI-824VUP+ is an Ethernet Wireless VPN Router ideal for home networking and small business networking. The setup wizard will guide you to configure the DI-824VUP+ to connect to your ISP (Internet Service Provider). The DI-824VUP+'s easy setup will allow you to have Internet access within minutes. Please follow the setup wizard step by step to configure the DI-824VUP+." Below this text is a "Run Wizard" button. In the bottom right corner of the main content area, there is a red circular icon with a white plus sign and the word "Help" below it.

### Ping Test

Ping Test is used to send "Ping" packets to test if a computer is on the Internet.

Host Name or IP address

### Restart Device

Reboots the DI-824VUP+.

### Block WAN Ping

When you "Block WAN Ping", you are causing the public WAN IP address on the DI-824VUP+ to not respond to ping commands. Pinging public WAN IP addresses is a common method used by hackers to test whether your WAN IP address is valid.

Discard PING from WAN side  Enabled  Disabled

### SPI mode

You can setup this item if you want to enable SPI mode.

Enabled  Disabled

### DoS

Enabled  Disabled

### UPnP Setting

You can disable or enable UPnP functions at anytime.

Enabled  Disabled

### VPN Pass-Through

Allows VPN connections to work through the DI-824VUP+.

PPTP  Enabled  Disabled

IPSec  Enabled  Disabled

### Non-standard FTP port

You have to setup this item if you want to access an FTP server whose port number is not 21.
