## 1. Introduction

This is a sleek powerful tool and easy to carry USB phone. It has USB port to connect into PC, and it allows you communicate with others through internet. It includes other features to enhance internet voice chat futures, because it has same ability as USB phone such as portable and easy to use, and you can use it for PC to PC or PC to Phone; along with crystal clear voice communication with minimize noise. It has phone's look but it is best to use for family, office or SOHO

## 2. Package Contents

The DPH-10U package includes the following (note that your particular hardware and cables may look slightly different than shown below).

## 3. Requirements

In order to install the DPH-10U VoIP USB Phone you will need the following:

1. DPH-10U VoIP USB Phone
2. PC with the following minimum specifications:
  - Pentium 400MHz or equivalent
  - Windows 2000 or XP
  - Available USB port (1.0, 1.1 or 2.0)
  - Skype™ version 1.1.079 or higher ([www.skype.com](http://www.skype.com)) must be installed
  - 128MB RAM
  - 10MB available hard disk space
  - CD-ROM drive to install DPH-10U software from the supplied CD-ROM

## 4. DPH-10U Installation

The following instructions will guide you through the process of installing the DPH-10U VoIP USB Phone.

The installation procedure is to:

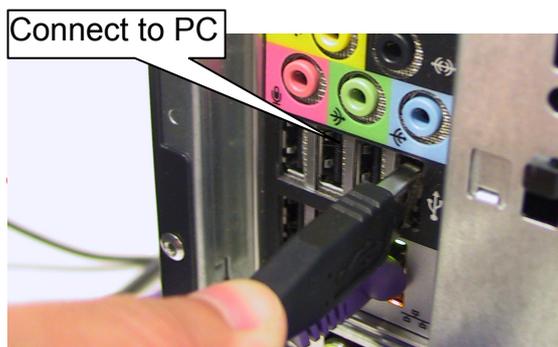

- Install Skype™ (step 1 below)
- Plug in the DPH-10U WHEN INSTRUCTED TO DO SO (step 2 below)
- Start the DPH-10U software installation (step 3 below)
- Following the installation is OK (step 3 below)
- Use your DPH-10U to make Skype™ calls

The detailed instructions follow:

**STEP 1:** If Skype™ is not already installed on your computer, visit <http://www.skype.com> and follow the instructions there to install Skype™. Verify that Skype™ is working before installing the DPH-10U.

**STEP 2:** Connect the DPH-10U USB port as shown below.

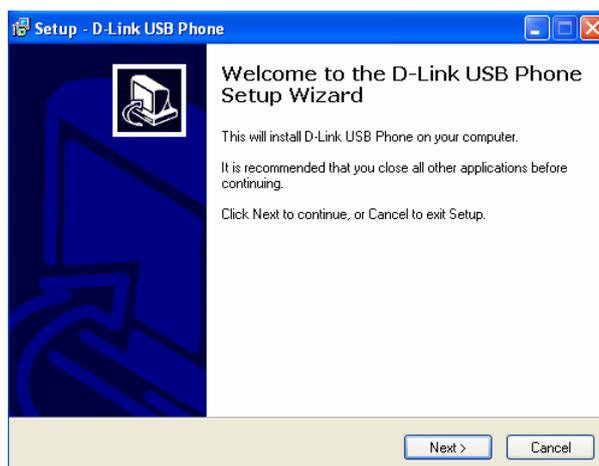

You will see the following popup. Press Yes to proceed or No to cancel.

**STEP 3:** Insert the supplied CD-ROM into your PC CD-ROM drive. The installation should start automatically. Please press “Software(Utility)”.

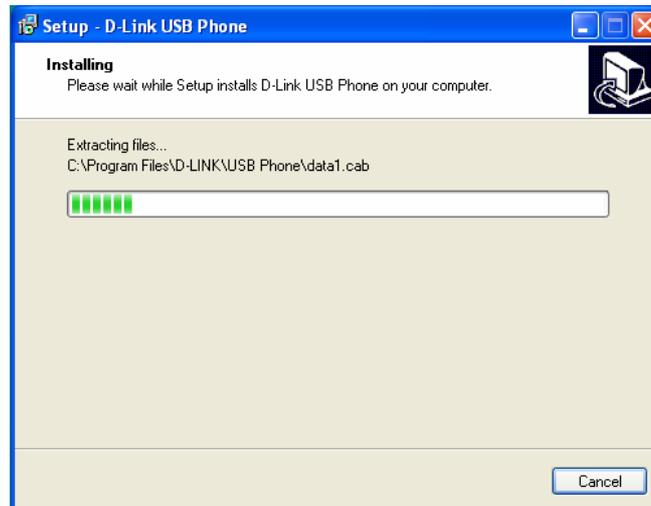

**STEP 4:** You will see the following popup. Press Next to proceed or cancel to stop the install processes.

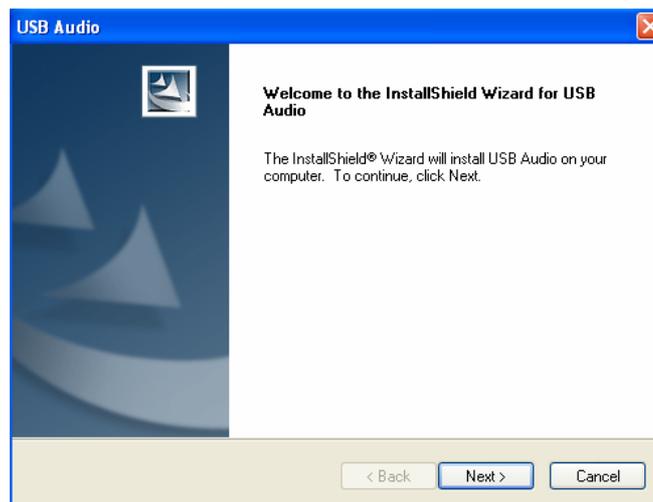

**STEP 5:** You press the Install and stare to install the DPH-10U Utility.

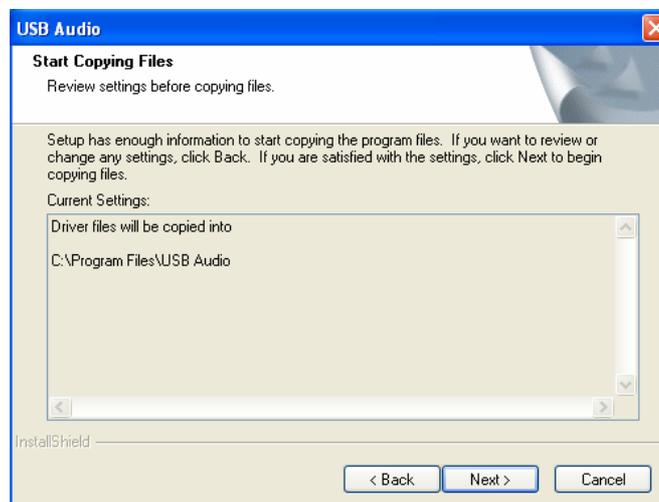

**STEP 6:** You will see the following progress bar below indicating that the installation is proceeding.

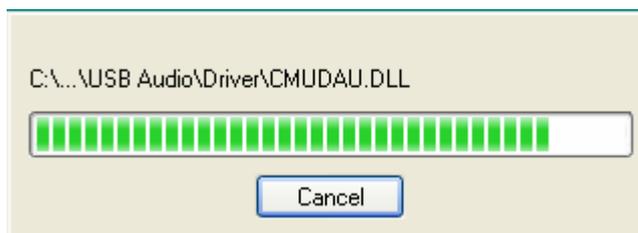

**STEP 7:** The program installing audio driver. Press Next.

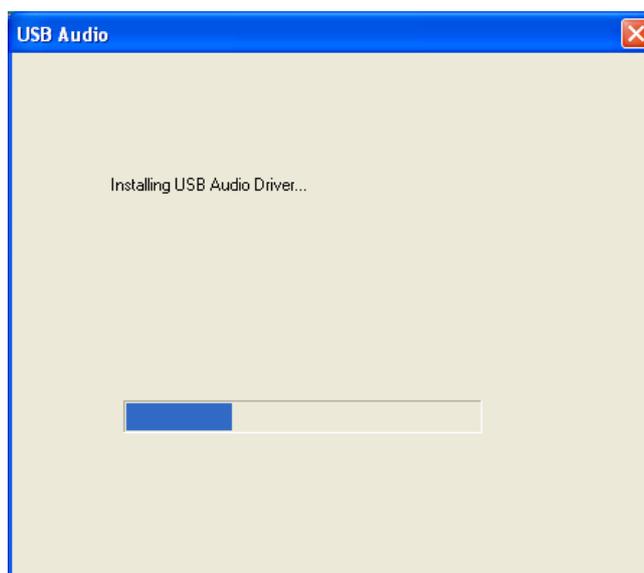

**STEP 8:** You will see the driver install path. Press Next

**STEP 9:** You will see the following progress bar below indicating that the installation is proceeding

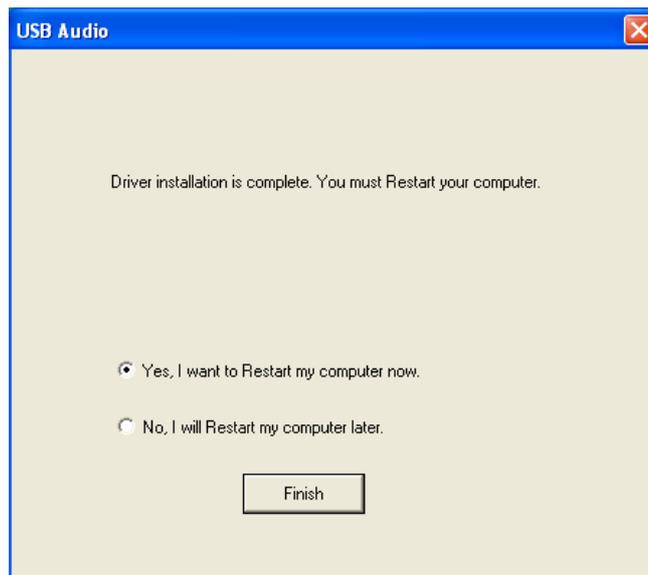

**STEP 9:** You will see the following progress bar below indicating that the installation is proceeding

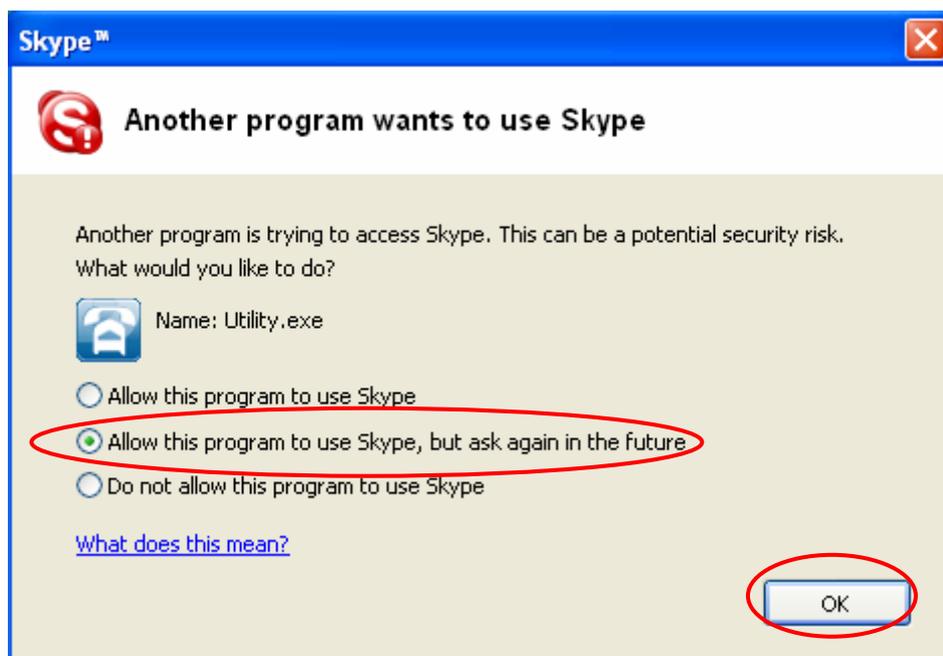

**STEP 10:** You will see the following popup. Press Finish to close the installation

**STEP 11:** You will see the following popup. Press Finish to close the program and restart computer

**STEP 12:** When you will see the following screen, select the option, “allow this program to use Skype” and press the **OK** button.

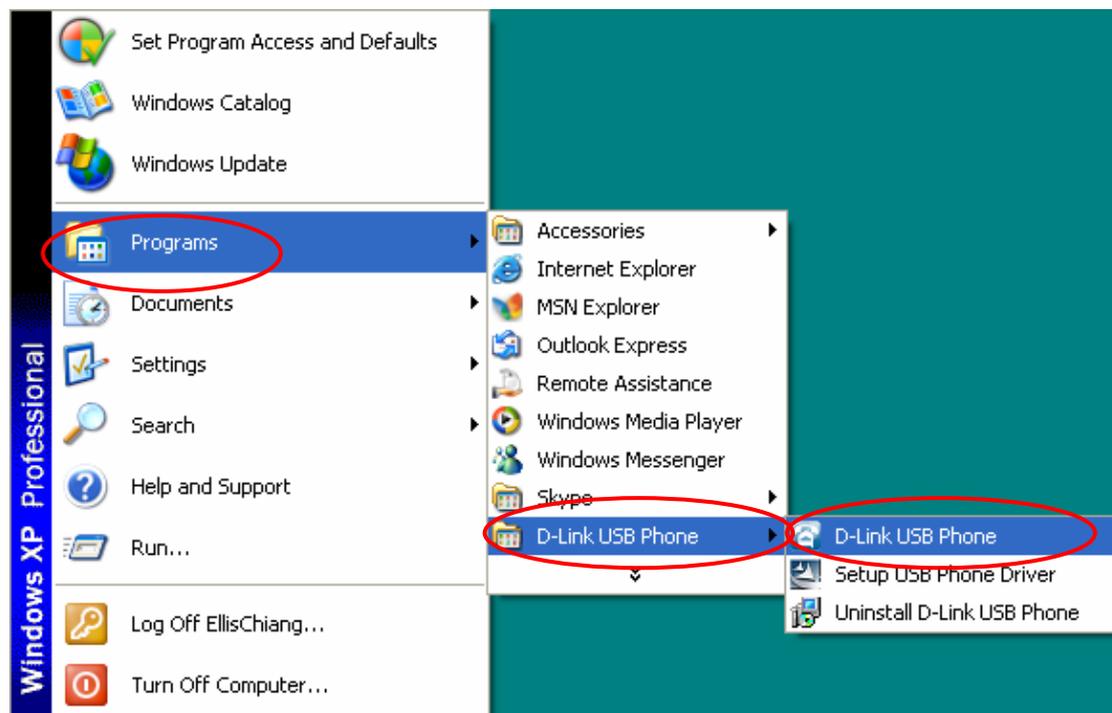

**STEP 13:** When the installation completes you should see the following message appear near your system tray and a new telephone icon (circled in red below) in your system tray as shown below.

The USB Phone icon indicates that the DPH-10U software is installed and running and that you can start making calls with DPH-10U

You will see a new program group named “USB Phone”, accessed from the Start button -> All Programs as shown below.

Your final configuration should resemble the following.

DPH-10U connect PC

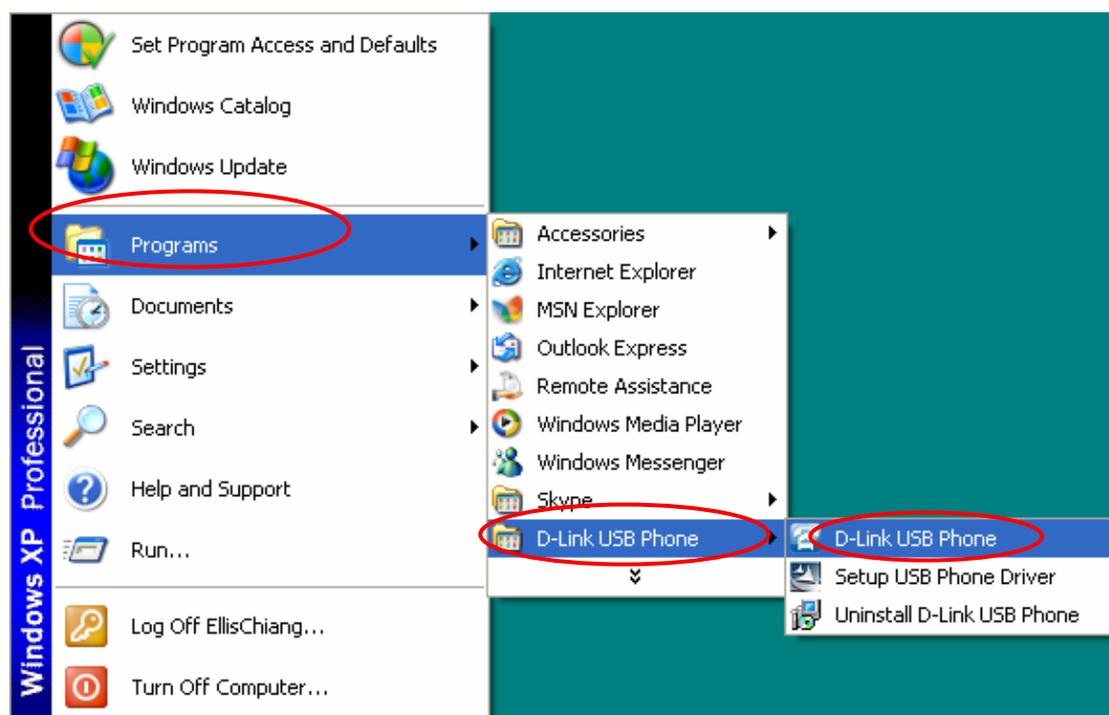

DPH-10U connect NB

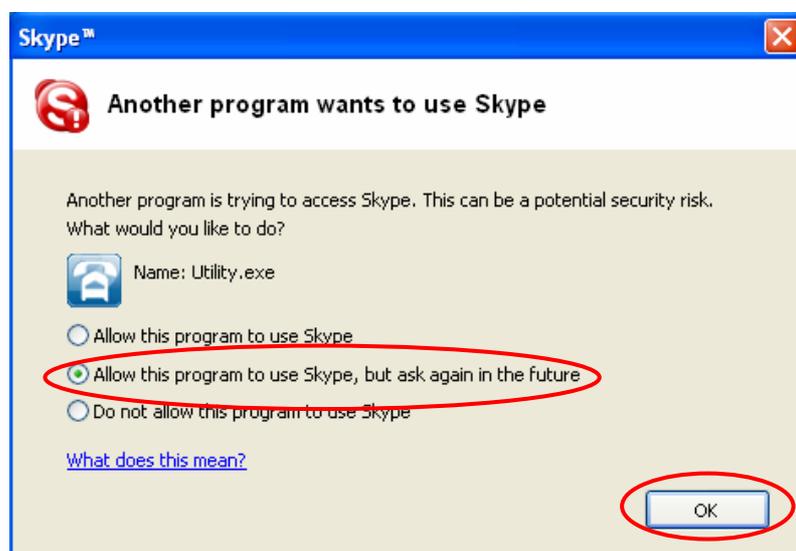

## 5. Enabling DPH-10U

In order to use DPH-10U and its features, (1) the DPH-10U VoIP USB Phone must be plugged into the PC, (2) the DPH-10U utility must be running (see green telephone in the Windows System Tray).

If the DPH-10U utility is not running (i.e. no blue telephone in the system tray), make sure the DPH-10U VoIP USB Phone is connected to the PC and start the DPH-10U as shown below (Start -> Programs -> USB Phone -> USB Phone):

You may see the following screen, select the option, “allow this program to use Skype” and press the **OK** button.

You should now see the DPH-10U in the Windows System Tray as shown below.

You are now ready to use the DPH-10U VoIP USB Phone.

### 7.2 Testing DPH-10U

Skype provides a useful feature to test your connection. It is called Echo123. If you send “callme” in a chat with echo123, the echo123 service will call you and let you leave a message which will be played back to you. This will help you verify that the DPH-10U VoIP USB Phone, D-Link driver and the telephone are all connected and installed properly.

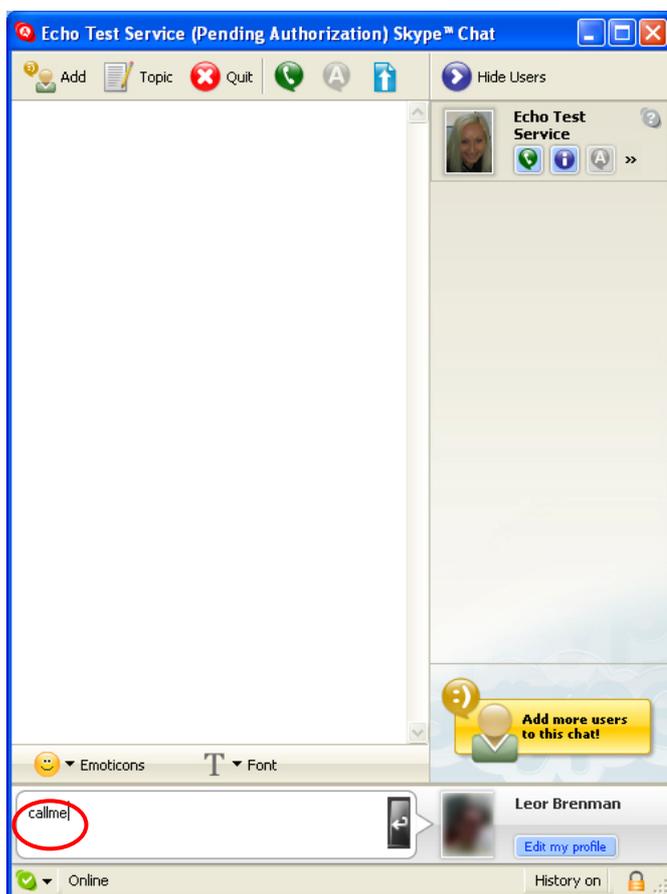

Add Echo123 to your Skype contact list from the Skype Tools menu -> Add to Contact List entry as shown below:

When Echo123 is added, click on the chat button as shown below.

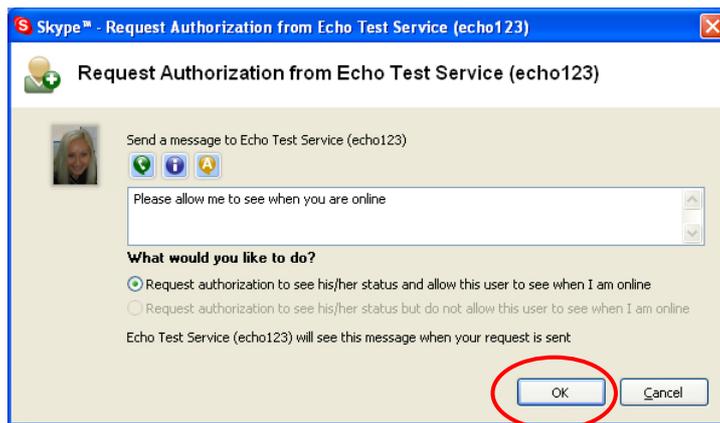

You will see the following chat screen and you should enter "callme" and press the Enter key on your keyboard.

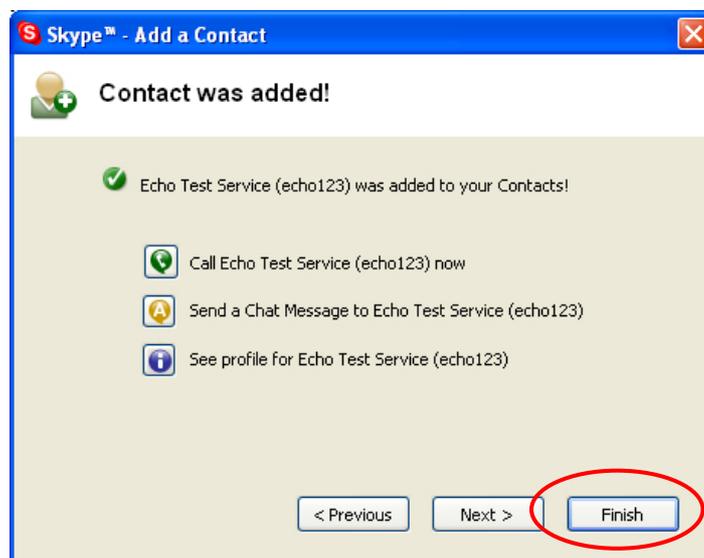

Within 10-20 seconds, you should see the following screen, and the DPH-10U VoIP USB Phone should ring. Pick up the handset and follow the instructions. The Echo Test Service will ask you to leave a message which will be played back immediately. This will help you verify that the DPH-10U VoIP USB Phone, DPH-10U Utility and DPH-10U Device are all connected and installed properly.

When the test concludes you can press OK on the following screen.

and then press Finish on the following screen.

## 8. Utility Configuration
