

D-Link Quick Installation Guide

This product works with the following operating system software: **Windows XP, Windows 2000, Windows Me, Windows 98SE**

DWL-G122
AirPlus™ G 802.11g
USB Wireless Adapter

Before You Begin

You must have at least the following:

- You will need a computer with an available USB port to connect the DWL-G122 Wireless USB adapter.
- At least a 300 MHz processor and 32 MB of memory
- An 802.11b/g Access Point (for Infrastructure Mode) or another 802.11b/g wireless adapter (for Ad-Hoc; Peer-to-Peer networking mode.)
- Properly installed and working USB Controller.

Check Your Package Contents

These are the items included with your DWL-G122 purchase:

DWL-G122 802.11g Wireless USB Adapter

CD-ROM (containing Drivers, Manual and Warranty)

USB Extension Cable

If any of the above items are missing, please contact your reseller.

1

Insert the D-Link CD-ROM Into Your Computer

Turn on the computer and Insert the D-Link AirPlus™ G DWL-G122 Driver CD in the CD-ROM drive.

The step-by-step instructions that follow are shown in Windows XP. The steps and screens are similar for the other Windows operating systems.

 Do **NOT** install the DWL-G122 USB Adapter into your computer before installing the driver software on the D-Link CD!

Click **Install Driver**

If the CD Autorun function does not automatically Go to **Start > Run** on your computer, then type “D:\PC\Driver\Setup.exe.” If it does start, proceed to the next screen.

Type “D:\Driver\Setup.exe.”

Click **OK**

 The letter “D” represents the letter of the CD-ROM drive. Your CD-ROM drive may be a different drive letter.

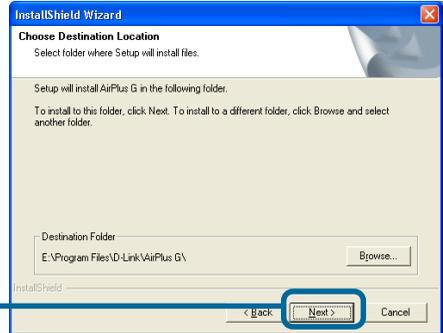

Click **Next**

Click No, I will restart my computer later

Click Finish

Shut down Your Computer

Product Overview

2 Installing the DWL-G122 Wireless USB Adapter to Your Computer

Plug the DWL-G122 into your USB Port.

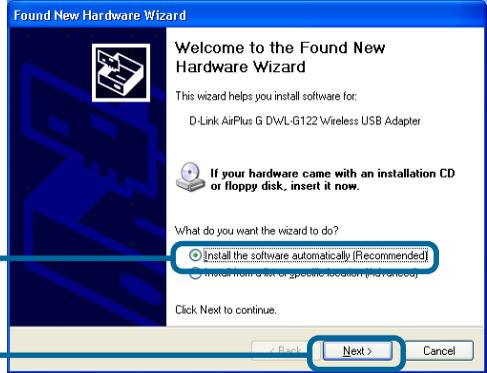

3

Turn on Your Computer

When you restart your computer this **Found New Hardware Wizard (Windows XP)** screen will appear:

Select **Install the software automatically (Recommended)**

Click **Next**

 A screen similar to this **Digital Signature Not Found** screen may appear during the installation.

Click **Continue Anyways**

Click **Finish**

For Windows Me and 98SE, this screen may appear.

Click **Yes** to finalize the installation

4

Your Installation is Complete!

After you've continued in Windows XP (or after the computer restarts in the other Windows operating systems), the D-Link *Air Plus™ G DWL-G122 Configuration Utility* will automatically start and the utility icon will appear in the bottom right hand corner of the desktop screen (systray). **If this icon appears GREEN, then you have successfully installed the DWL-G122, are connected to a wireless network and are ready to communicate!**

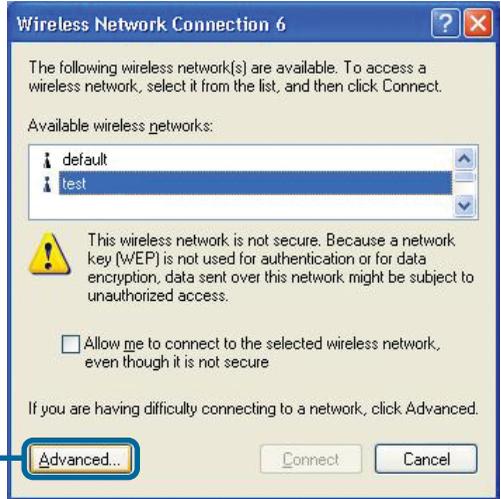

For Windows XP, if you wish to use the **AirPlus USB Utility**, please perform the following steps.

Double-click the **utility icon** to use the configuration utility.

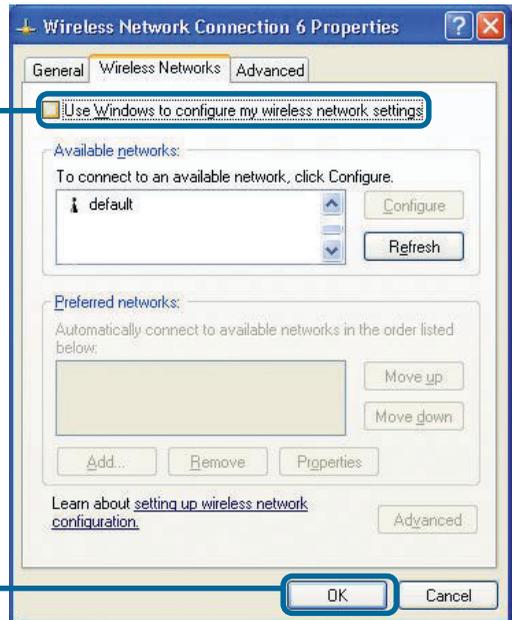

4

Your Installation is Complete! (Cont.)

Click **Advanced**

Uncheck **“Use Windows to configure my wireless network settings.”**

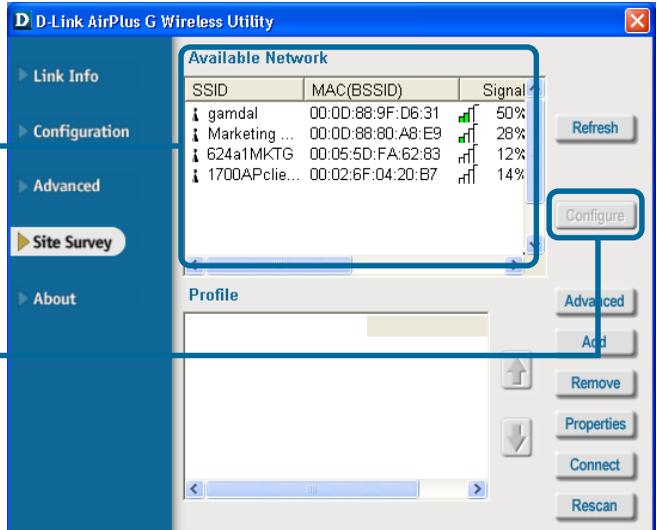

Click **OK**

5

Connecting to a Wireless Network

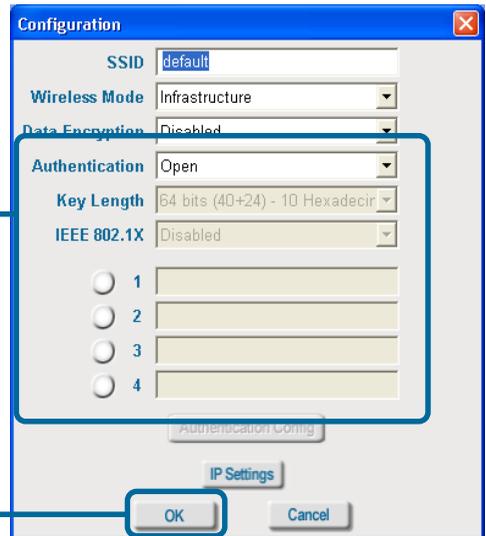

This window displays the available wireless networks.

Click **Configure** after highlighting a wireless network you want to connect to.

By initial factory settings, WEP encryption is turned off. If your access point or wireless router is configured with WEP encryption, please make sure to enter the correct WEP key.

Click **OK**

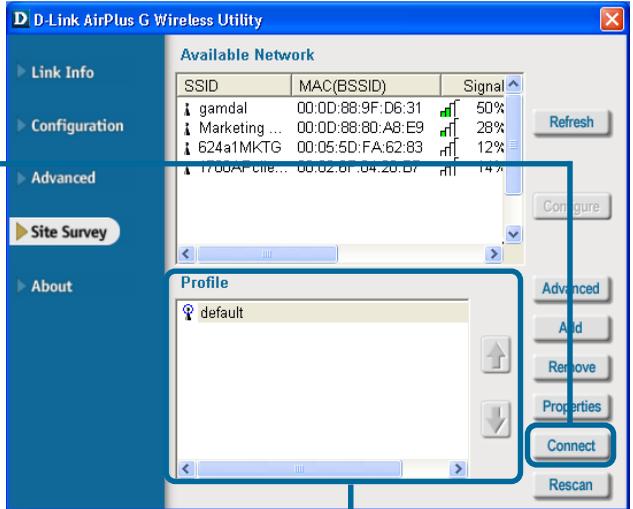

5

Connecting to a Wireless Network (cont.)

Click **Connect**

Finished! You should now be connected to your wireless network! Now you are ready to participate in your new wireless environment!

The configured access point or wireless router will be displayed in the bottom window. If you have more than one profile, select the profile you wish to connect to.

Appendix B - Link Info

Using the Configuration Utility

For Windows Operating Systems

A. Status: Displays the MAC Address of the Access Point that is associated with the DWL-G122.

B. SSID: The Service Set Identifier is the name assigned to the wireless network. The factory SSID setting is set to **default**.

C. Frequency: Displays the current frequency used by the adapter.

D. Wireless Mode: The factory setting is set to Infrastructure. Ad-Hoc mode is used for peer-to-peer networking.

Link Info

- A** Status: Associated BSSID=00:0D:88:95:59:BB
- B** SSID: default
- C** Frequency: 802.11g
- D** Wireless Mode: Infrastructure
- E** Encryption: Enabled
- F** Connection Info: Connected
- G** Tx Rate: 54.0 Mbps
- H** Channel: 6
- I** Signal Quality: Signal Strength 100%, Link Quality 67%

Packet Count

Transmit	Receive
>500	
250	
0	

E. Encryption: Displays the current encryption status of the wireless connection.

F. Connection Info: Displays your current Connection State.

G. TxRate: TxRate settings are automatically determined by the DWL-G122 depending on the distance from the access point.

H. Channel: Displays the channel information. By default, the channel is set to 6. Please note that the DWL-G122 will automatically adjust channel depending on the Access Point.

I. Signal Strength / Link Quality: Represents the wireless signal quality and strength between the access point and the DWL-G122. The percentage coincides with the graphical bar.

Appendix B (cont.) Configuration

J. SSID: The Service Set Identifier is the name assigned to the wireless network. The factory SSID setting is set to **default**. Make changes here to match the SSID on existing Wireless Router or Access Point.

K. Wireless Mode: The factory setting is set to **Infrastructure**. Ad-Hoc mode is used for peer-to-peer networking.

L. Data Encryption: The default setting is set to **Disabled**. The adapter supports WEP when encryption is enabled.
