[Basic Manual Setup for G413X-How to change Wi-Fi Name]
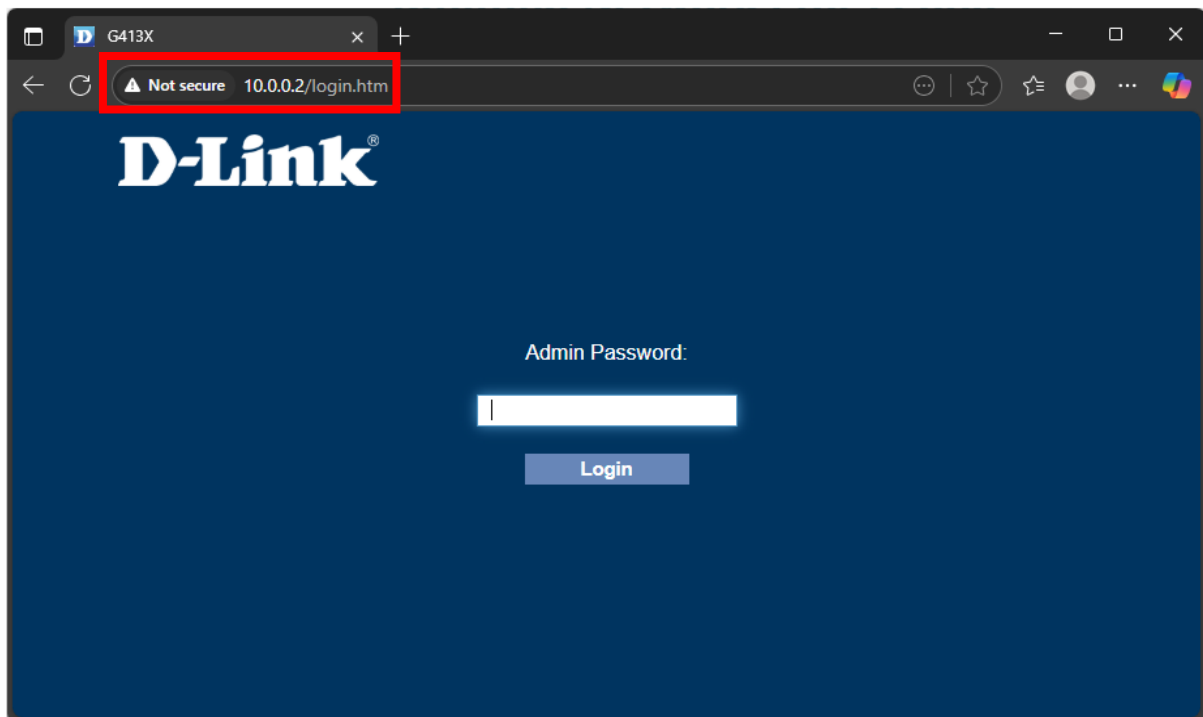

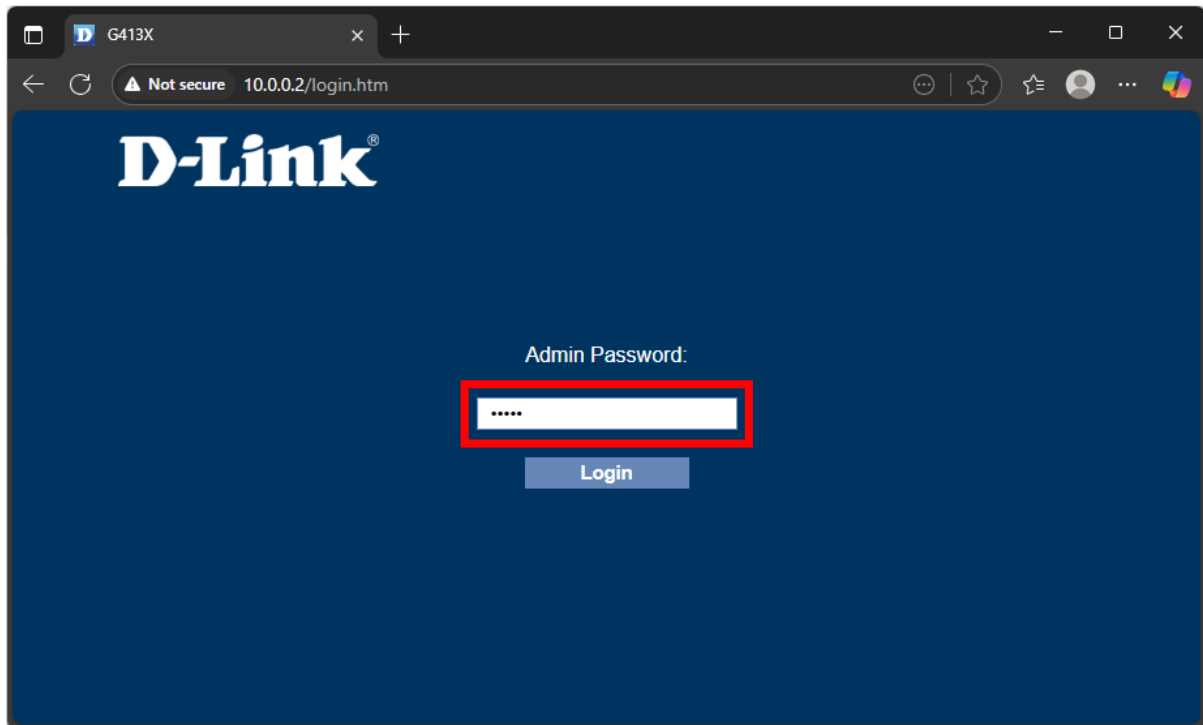

1) On a device that is connected to the router (preferably with a cable on a pc/laptop or WiFi on a phone is fine but please make sure your mobile data is off).
   Note: this config is best done with a LAN cable.

2) Open a web Brower (internet explorer/google chrome/firefox) input the IP address of your router (default is 10.0.0.2 unless it was changed), we will use Microsoft Edge in this example.

3) Login (default password is admin unless it was changed)

4) Go to Wireless (top) then Basic Settings (left)
   a. Click [Basic Settings] for 2.4GHz if you wish to change the name for 2.4G WiFi
   b. Click [Basic Settings] for 5GHz if you wish to change the name for 5G WiFi

TX restrict: 0   Mbps (0:no restrict)

RX restrict:: 0   Mbps (0:no restrict)

Associated Clients: **Show Active Clients**

Enable Universal Repeater Mode: ☐

Save & Apply   **Reset**

D-Link® Setup Guides

5) Click on the details next to SSID and update to a Wi-Fi name of your preference.
   Note: Make sure that the Wi-Fi names of 2.4G & 5G Wi-Fi is not exactly the same.
   For example, you can name xxx-2.4G & xxx-5G, so it is similar but not the exact same name.

6) Click on Save & Apply after changing the Wi-Fi name.

7) Restart the router after the countdown is done & the change is done

8) Please remember to update the Wi-Fi connection on your previously connected devices.
